10-HOUR OSHA CONSTRUCTION SAFETY COURSE FOR THE LANDSCAPE INDUSTRY

➤ WHAT IS THE COURSE?

A safety course providing general awareness on recognizing and preventing hazards on the job-site. The course covers the curriculum of the OSHA 10-Hour Construction Industry Outreach Training Program but has been designed to emphasize hazards and exposures that are unique to green industry work sites.

The course comprises of 10 full hours of instruction time and is normally given on 2 consecutive days.

➤ WHO INSTRUCTS THIS COURSE?

All instructors are OSHA-authorized and NALP approved. They have industry experience and bring invaluable knowledge to the course. Instructors are permitted to tailor the training to their audience so a company's special focus can be addressed.

➤ WHO SHOULD CONSIDER TAKING THE COURSE?

Field employees, entry level employees, project managers, owners and supervisors.

➤ BENEFITS OF TAKING THE COURSE

OSHA does not require anyone to complete the OSHA 10-hour course but there are some states and municipalities that have made the classes mandatory for certain workers.

Taking the course helps create a strong safety culture for a company. It establishes a sense of professionalism that a company can show their employees, clients and business partners. The course helps a company stay educated on up-to-date safety standards which in return helps mitigate risks.

Upon taking the course you will receive:

- The official “DOL Outreach Course Completion Card” that is required for commercial contracting work in some states and municipalities
- The National Association of Landscape Professionals Course Certificate
- 10 Continuing Education Units for NALP Landscape Industry Certified individuals
- Course book and material to bring back to the team

➤ WHAT IS COVERED IN THE COURSE?

- **Introduction to OSHA** - Standards & Regulations Impacting the Green Industry
- **Fall Prevention and Protection** - Ladder Safety/Trimming & Pruning/Slippery Surfaces
- **Struck-By Hazards** - Flying & Falling Debris/Unattended-Unsafe Equipment
- **Caught-In and Between Hazards** - Entanglements/Crushing Incidents
