

## JOHN DEERE Scholarship

---

**JOHN DEERE**

A great company is also a great citizen. We at John Deere aspire to be a catalyst for positive global change by focusing our energy, intellect, and resources on solving world hunger, empowering others through education, and developing our home communities. We do this by investing purposefully and focusing our philanthropic and volunteerism efforts to achieve higher and sustainable living standards for people everywhere.

As one of our core values, innovation is critical to John Deere's success. For innovation to thrive, however, vigorous educational opportunities must exist to teach and inspire our next generation of innovators. Therefore, we invest in projects that provide inspiring, rewarding and innovative educational experiences for youth, particularly in our home communities.

For more than 170 years, we've continuously supported education activities at all levels by partnering with local schools, sponsoring FFA associations, participating in Junior Achievement training programs, collaborating with technical service training programs, donating equipment and components to college instructors for hands-on application, and by actively participating in AEF.

John Deere is honored to offer the Green Industry Scholarship to a financially deserving student that exhibits merits of scholastic accomplishments and outstanding citizenship, while that pursuing a degree related to the landscape industry.

Ken Taylor, CLP  
General Manager, Corporate Business Division, John Deere
